2235. Add Two Integers

Solved Easy  Topics 

Given two integers `num1` and `num2`, return *the sum of the two integers*.

Example 1:

Input: `num1 = 12, num2 = 5`**Output:** `17`**Explanation:** `num1` is 12, `num2` is 5, and their sum is `12 + 5 = 17`, so 17 is returned.

Example 2:

Input: `num1 = -10, num2 = 4`**Output:** `-6`**Explanation:** `num1 + num2 = -6`, so -6 is returned.

Constraints:

- `-100 <= num1, num2 <= 100`

</> Code

Java  Auto

```
1 class Solution {
2     public int sum(int num1, int num2) {
3         return num1 + num2;
4     }
5 }
```
