189. Rotate Array

Solved 

Medium

 Topics Hint

Given an integer array `nums`, rotate the array to the right by `k` steps, where `k` is non-negative.

Example 1:

Input: `nums = [1,2,3,4,5,6,7], k = 3`**Output:** `[5,6,7,1,2,3,4]`**Explanation:**rotate 1 steps to the right: `[7,1,2,3,4,5,6]`rotate 2 steps to the right: `[6,7,1,2,3,4,5]`rotate 3 steps to the right: `[5,6,7,1,2,3,4]`

Example 2:

Input: `nums = [-1,-100,3,99], k = 2`**Output:** `[3,99,-1,-100]`**Explanation:**rotate 1 steps to the right: `[99,-1,-100,3]`rotate 2 steps to the right: `[3,99,-1,-100]`

Constraints:

- `1 <= nums.length <= 105`

</> Code

Java   Auto

```
1 class Solution {
2     public void rotate(int[] nums, int k) {
3         int n = nums.length;
4         k %= n; // Handle k > n (e.g. k=10 on
5
6         reverse(nums, 0, n - 1); // Reverse
7         reverse(nums, 0, k - 1); // Reverse
8         reverse(nums, k, n - 1); // Reverse
9     }
10
11     private void reverse(int[] nums, int left
12         while (left < right) {
13             int temp = nums[left];
14             nums[left++] = nums[right];
15             nums[right--] = temp;
16         }
17     }
18 }
```
